Deferred tax

Deferred tax is recognised in respect of all timing differences, which have originated but not reversed at the balance sheet date. Timing differences are differences between taxable profits and the results as stated in the financial statements, which arise from the inclusion of gains and losses in tax assessments in periods different from those in which they are recognised in the financial statements.

Deferred tax is not recognised when fixed assets are revalued unless by the balance sheet date there is a binding agreement to sell the revalued asset and the resulting gain or loss has been recognised in the financial statements.

Neither is deferred tax recognised when fixed assets are sold and it is more likely than not that the taxable gain

will be rolled over, being charged tax only if and when the replacement assets are sold.

Deferred tax is measured at the average tax rates which are expected to apply in the periods in which the timing

differences are expected to reverse, based on tax rates and laws which have been enacted or substantively

enacted by the balance sheet date. Deferred tax is measured on a non - discounted basis.
