Notes to the Abbreviated Accounts for the period ended 30 April 2013**1 Accounting Policies****Basis of measurement and preparation of accounts**

The financial statements are prepared under the historical cost convention.

Turnover policy

Turnover represents revenue recognised in the accounts. Revenue is recognised when the company fulfils its contractual obligations to customers by supplying goods and services and excludes value added tax. (Where services are performed gradually over time revenue is recognised as activity progresses by reference to the value of work performed).

Tangible assets depreciation policy

Depreciation is provided on tangible assets at the following rates in order to write off the cost less residual value over the assets' expected useful life: (Office Equipment – 20% per annum)

Other accounting policies**Deferred Taxation**

Deferred tax arises as a result of including items of income and expenditure in taxation computations in periods different from those in which they are included in company's accounts. Deferred tax is provided in full on timing differences which result in an obligation to pay more (or a right to pay less) tax at a future date, at the tax rates that are expected to apply when the timing differences reverse based on current tax rates and laws.

Deferred tax is not provided on timing differences arising from the revaluation of fixed assets where there is no commitment to sell the asset.

Deferred tax assets are recognised to the extent that it is regarded as more likely than not that they will be recovered. Deferred tax assets and liabilities are not discounted.

However, as there are no timing differences no provision is required.
